What does Co-Development together with MWA Solutions mean?

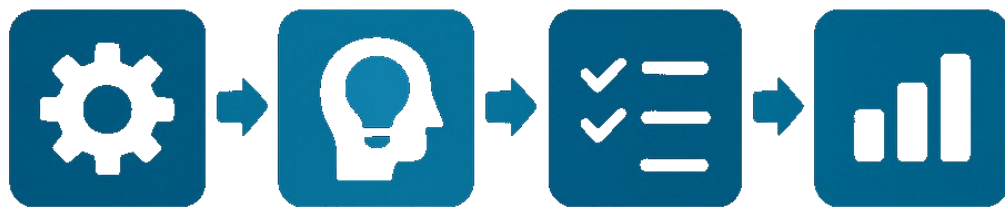

Our clients actively contribute – from functional scope to the user interface.

The result:

A custom-fit solution tailored precisely to your operational processes!

The Development Process

Planning → Ideation → Implementation → Outcome

1. Joint requirements analysis
2. Agile development & regular feedback sessions
3. Pilot phase & review loops
4. Rollout & operations

Applications & Modules

Transport Management:

Orders, routes, freight costs

Route Optimization:

Save resources through AI-assisted route planning

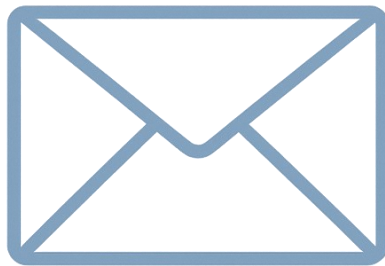

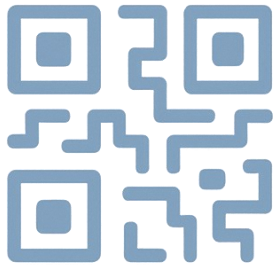

Asset Management:

Digitally manage machines, vehicles & other assets

Maintenance (CMMS):

Efficiently organize maintenance and task scheduling
