# Why logistocat?

logistics transport optimization calculating tool

logistocat is the digital platform for medium-sized companies aiming to make their logistics processes more efficient, transparent, and sustainable.

- Time savings through digital processes
- Optimized internal & external communication
- Reduced error rate & increased transparency

**Modular | Online | Mobile | Future-Proof**

## Who benefits?

- SMEs with their own vehicle fleet and transport department
- Mid-sized waste management companies
- Service providers in the field of nationwide maintenance

# Plan transports digitally – execute efficiently

## Transportmanagement

- Digital & transparent dispatching
- Integration into your existing processes
- Real-time tracking & status feedback

## Route Optimization

- Digital & transparent dispatching
- Integration into your existing processes
- Real-time tracking & status feedback

**Efficient Routes | Fewer empty runs | Lower costs**

# Asset-Management

## Centralized Management

- Containers
- Vehicles
- Transport containers
- Container scanning
- Package scanning
- Navigation
- Mobile processing
- Document printing
- Real-time asset tracking

## Maintenance (CMMS)

Maintenance logs can be created individually & edited on mobile devices

Automated maintenance orders with route integration

Maintenance objects can be created individually

Maintenance locations can be visualized on a map

**Efficient | Safety | Mobile**

# Use Case & contact

## Example:

### Document shredding with logistocat

- Document container management & tracking in real time
- Fully integrated route optimization
- Transparent status updates & locking logic
- Container locations visualized on the map
- Transport & shredding
- Mobile order processing & navigation
